CHEMICAL PHYSICS

Volume 130, number 1,2,3, 15 February 1989

CONTENTS

Study of the N_2 b $^1\Pi_u$ state via 1 + 1 multiphoton ionization
W. Ubachs, L. Tashiro and R.N. Zare 1

A molecular dynamics study of the crystalline and liquid phases of pyridine
Z. Gamba and M.L. Klein 15

Clusters as crystal fragments of silicon bulk
H. Kupka and K. Jug 23

MRD CI study on the low-lying states of AlP
U. Meier, S.D. Peyerimhoff, P.J. Bruna, S.P. Karna and F. Grein 31

Quantum-chemical analysis of the propeller-shaped molecule [4,4,4]-propellahexaene. A study in heavy-atom tunneling
F. Zerbetto and M.Z. Zgierski 45

The rate constant in the Kramers multidimensional theory and the saddle-point avoidance
A.M. Berezhkovskii, L.M. Berezhkovskii and V.Yu. Zitzerman 55

Local magnetic anisotropy in amorphous transition metals: a problem of metal physics treated with methods of quantum chemistry
M.C. Böhm, C. Elsässer, M. Fähnle and E.-H. Brandt 65

A microscopic model of chemical reactions with reorganization. High-energy approximation
M.V. Basilevsky and S.I. Petrochenko 89

Nonequilibrium effects in thermal reactions with reorganization. General approach and low-energy approximation
M.V. Basilevsky and S.I. Petrochenko 103

Non-equivalence of groups in radical ions of symmetric molecules. I. Non-empirical study of model σ-radical
L.N. Shchegoleva and P.V. Schastnev 115

The potential energy surfaces and the radiationless dynamics of excited states of benzene and pyrazine
A.L. Sobolewski and R. Czerminski 123

Correlations between dynamical properties and features of potential energy surfaces for the light atom transfer reactions O + HCl → OH + Cl and Cl + HCl → ClH + Cl
A. Persky and H. Kornweitz 129

Field effects on dielectronic recombination rate coefficients of Mg^+ ions
D.S. Belić 141

A proposal for the theoretical treatment of multi-electronic-state molecular dynamics: hemiquantal dynamics with the whole DIM basis (HWD). A test on the evolution of excited Ar_3^+ cluster ions
M. Amarouche, F.X. Gadea and J. Durup 145

dc electrical conductivity activation energy in quasi-one-dimensional molecular semiconductors. I. One radical electron per dimer
V.M. Yartsev and A. Graja 159

(continued on page 3 of cover)

CONTENTS

(continued from page 4 of cover)

The infinite dilution short-range and long-range activity coefficient of ions in a solvent of polarizable hard spheres
F. Grądzki 167

Bulk modulus for some simple molecular fluids
A. Compostizo, A. Crespo Colin, M.R. Vigil, R.G. Rubio and M. Diaz Peña 177

The Ne–Ne interatomic potential revisited
R.A. Aziz and M.J. Slaman 187

RISM study of the structure of sulphur dioxide at a plane wall
B. Borštnik and D. Janežič 195

Theoretical investigation of the effects of intramolecular electron-spin relaxation on Stern–Gerlach deflections
D.R. Herrick, M.B. Robin and A. Gedanken 201

Theoretical calculations on radiative and nonradiative processes of quartet states of HeH
I.D. Petsalakis and G. Theodorakopoulos 211

Geometry relaxation effects in the $1\ ^1B_u$ and $2\ ^1A_g$ states of trans-1,3-butadiene
P.G. Szalay, A. Karpfen and H. Lischka 219

Valence bond formulation of Hartree–Fock instability conditions for simple and multiple bonds
M.B. Lepetit, J.P. Malrieu and G. Trinquier 229

Nonlinearity and irreversibility in the theory of the solvent effect of proton transfer dynamics. II. Dissipative system
P. Bañacký and A. Zajac 241

Proton dynamics in the hydrogen bond. Inelastic neutron scattering by single crystals of CsH_2PO_4 at 20 K
F. Fillaux, B. Marchon, A. Novak and J. Tomkinson 257

On the model-independent determination of $\langle P_4 \rangle$ from time- and angle-resolved fluorescence depolarization on macroscopically oriented lipid multibilayer systems
H. van Langen, G. van Ginkel and Y.K. Levine 271

Picosecond relaxation path of ethyl violet
M.M. Martin, E. Breheret, F. Nesa and Y.H. Meyer 279

Picosecond studies on the photodissociation dynamics of aromatic endoperoxides
Th. Blumenstock, K. Jesse, F.J. Comes, R.Schmidt and H.-D. Brauer 289

State-selected reaction and relaxation of CH with H_2
T.-X. Xiang and W.A. Guillory 299

Photodissociation of NO_2. Internal energy distribution and anisotropies in the fragments
M. Mons and I. Dimicoli 307

The decomposition of $C_4H_8^+$ complexes at controlled internal energies
C.E. van der Meij, J. van Eck and A. Niehaus 325

(continued on previous page)

CONTENTS

(continued from page 3 of cover)

Molecular determinants for drug–receptor interactions. 8. Anisotropic and internal motions in morphine, nalorphine, oxymorphone, naloxone and naltrexone in aqueous solution by carbon-13 NMR spin–lattice relaxation times
A. Grassi, G.C. Pappalardo and B. Perly 335

Dielectric relaxation processes of symmetrically substituted phenols in a few glassy media
M.E. Huque and S. Walker 345

Electron diffraction structural study of thin films of a charge transfer complex prepared by the Langmuir–Blodgett method
H. Frisby and A. Bonnerot 353

Theoretical and experimental studies of radiative lifetimes of excited electronic states in CO^+
C.M. Marian, M. Larsson, B.J. Olsson and P. Sigray 361

Influence of the molecular structure and the nature of the solvent on the absorption and fluorescence characteristics of rhodamines
F. López Arbeloa, I. Urrecha Aguirresacona and I. López Arbeloa 371

Absorption spectroscopic investigation of rhodamine dye vapors
H. Weininger, J. Schmidt and A. Penzkofer 379

Treanor pumping of CO initiated by CO laser excitation
W. Urban, J.-X. Lin, V.V. Subramaniam, M. Havenith and J.W. Rich 389

Photoexcitation of dimethyl sulfide and dimethyl disulfide in the vacuum ultraviolet region: Rydberg states and photofragment emissions
I. Tokue, A. Hiraya and K. Shobatake 401

Absolute Balmer line and NH($c\,^1\Pi \rightarrow b\,^1\Sigma^+$, 0–0) vibrational band emission cross sections from NH_3 molecules excited by electron impact
J.M. Kurepa, M.D. Tasić and Z.Lj. Petrović 409

A–X and A′–X progressions in dissociative excitation of matrix-isolated I_2: rare gas effect on lifetimes and intensities
R. Böhling, J. Langen and U. Schurath 419

Two kinds of excimers in α-perylene and pyrene crystals: origin of Y and V emissions
H. Sumi 433

Vibrational spectra of stannane: harmonic force field, Raman and IR intensities from ab initio correlated wavefunctions
J. Fernandez Sanz, A. Marquez and C. Pouchan 451
